

Exercise: Do-While Loop with Switch Case

Console-Based Banking System

Write a Java program to create a console-based banking system. Use a do-while loop to display the menu repeatedly and a switch statement to process the user's choice.

Requirements

Start the account with a balance of 1000.00. The program must support checking the balance, depositing money, withdrawing money, transferring money, and exiting. Deposit, withdrawal, and transfer amounts must be greater than zero. The program must reject withdrawals and transfers that exceed the available balance.

Banking Menu

```
===== BANKING SYSTEM MENU =====  
1. Check Balance  
2. Deposit Money  
3. Withdraw Money  
4. Transfer Money  
5. Exit  
Enter your choice:
```

Test Scenarios

Scenario 1: Check Balance

```
Initial balance: 1000.00  
Menu choice: 1  
Expected Output:  
Current balance: 1000.00
```

Scenario 2: Deposit Money

```
Initial balance: 1000.00  
Menu choice: 2  
Deposit amount: 500.00  
Expected Output:  
Deposit successful.  
Current balance: 1500.00
```

Scenario 3: Withdraw Money

```
Current balance: 1500.00  
Menu choice: 3  
Withdrawal amount: 200.00  
Expected Output:  
Withdrawal successful.  
Current balance: 1300.00
```

Scenario 4: Transfer Money

Current balance: 1300.00

Menu choice: 4

Recipient account number: 1234567890

Transfer amount: 300.00

Expected Output:

Transfer successful to account 1234567890.

Current balance: 1000.00

Scenario 5: Exit the System

Menu choice: 5

Expected Output:

Thank you for using the banking system.
